KIN HAI

San Jose, CA · (669) 350-4814 · kinhai@outlook.com · linkedin.com/in/kinhai · kinhai-collab.github.io/portfolio

PROFESSIONAL SUMMARY

AI Product Manager with 10+ years shipping in regulated environments (FDA/GxP, PSD2, SOX). Built and launched Mira — a production agentic AI assistant with multi-tier model routing, RAG-powered memory, and HITL trust architecture. One of few AI PM in the market who has shipped production LLM systems from zero across both biotech compliance and financial services — and recovered a $10M/day operational crisis. At Genentech, delivered the only on-time go-live in a $500M+ global program with an AI roadmap accepted as executive strategic direction.

CORE SKILLS

AI Product: Agentic AI design · ReAct orchestration · RAG architecture · Multi-agent systems · Multi-tier model routing · HITL design · Confidence gate engineering · LLM integration · Voice AI (STT/TTS) · AI eval frameworks · pgvector · LLMOps · Prompt engineering

Product: 0→1 product development · AI roadmapping · Data-driven prioritization · OKRs & KPI ownership · User research & VoC · A/B testing · Freemium GTM · PRD authorship · Cross-functional stakeholder alignment

Technical: FastAPI · Python · AWS Lambda/ECS · PostgreSQL · Redis · OAuth 2.0 · OpenAI API (GPT-4o-mini/GPT-4o) · ElevenLabs · LangChain · SAP S/4HANA · EWM · SECS/GEM

Regulated Domains: FDA/GxP · DSCSA · PSD2 · SOX · Biotech drug distribution · Financial services API compliance

PROFESSIONAL EXPERIENCE

Founder & Head of Product Jun 2025 – Present

Mira AI · Voice-First Agentic Assistant · San Jose, CA

- Shipped a production voice-first agentic AI assistant (iOS/Android, March 2026) from zero — full 0→1 ownership across architecture, GTM, and team; designed three-tier model routing (DIRECT / SIMPLE / ORCHESTRATED) using GPT-4o-mini for intent classification and GPT-4o for complex ReAct reasoning, cutting per-session inference cost 40% with no measurable accuracy loss.
- Architected agentic trust framework: three-tier confidence gate (≥0.85 silent execute · 0.60–0.85 soft confirm · <0.60 clarification) and a six-state ExecutionStateMachine (planning → executing → confirming → observing → correcting → complete) derived directly from 127 user interviews — production guardrails grounded in real behavioral research.
- Designed HITL (human-in-the-loop) mandatory confirmation for all destructive calendar operations — trust architecture that balances autonomous execution with user control in a live agentic product.
- Owned RAG-powered memory: two-tier pgvector design (30-day TTL short-term + permanent user facts, 1536-dim embeddings) with LLM-driven fact lifecycle and semantic retrieval injected into every agent prompt.
- Prototyped full agentic workflow in N8n (voice→intent→orchestrator→email/calendar/RAG) as visual architecture blueprint — validated end-to-end flow before a single line of production code was written.
- Leads 10 direct reports (Eng Lead, DS Lead, 3 PMs) on equity-only structure; conducted 127+ user interviews; built 200+ organic waitlist; ranked #1 / 20+ products in AIPM Accelerator — Outstanding Product Leader award.

Senior PM, Supply Chain Platform 2023 – Dec 2025

Genentech (Roche) · Biotech Manufacturing · San Francisco, CA

- Shipped the North American SAP EWM supply chain platform for FDA/GxP-regulated biotech drug distribution — the only on-time go-live in a $500M+ global program; earned CEO recognition by inventing the Day-in-the-Life (DIL) testing framework that cut post-launch defects 60%, adopted as company-wide standard across 5 sites and 15 teams.
- Led post-launch crisis recovery with $10M/day on the line: VoC workshops + warehouse shadowing identified root causes; two-phase solution restored 100% DSCSA federal compliance in 8 weeks.
- Designed and presented the AI product roadmap accepted as executive strategic direction: rebuilt pick/pack/ship workflows across 5 sites to close DSCSA traceability gaps, expand data capture, and generate the structured operational data required for the lead initiative — ML-driven warehouse path optimization that learns and automates picking routes as confidence accumulates.

Product Lead, Manufacturing Platform 2020 – 2023

Lumentum · Optical & Photonic Manufacturing · San Jose, CA

- Shipped a unified manufacturing intelligence platform across 9 global semiconductor fabrication sites in 4 months — reset a 2-year stalled program with an MVP strategy (MVP0–MVP3), drove 82% adoption in 30 days, zero production incidents; awarded CEO Alan Lowe Execution & Delivery Excellence Award.
- Drove $30M+ in cost savings consolidating 3 legacy MES systems; cut equipment downtime 80% via SECS/GEM integrations — deliberately building the real-time data pipeline required for future AI features (predictive maintenance, anomaly detection, yield optimization).
- Partnered with Group VP Finance on Product Costing transformation; reduced PMO project approval cycle from 8 weeks to 2 weeks, adopted across IT and Operations.

Management Consultant, Global ITSM 2019 – 2020

ServiceNow · Santa Clara, CA

- Shipped a live asset and configuration dashboard tracking 10,000+ service assets globally — pivoted at-risk SACM program to MVP delivery to hit the deadline; team recognized as CIO Award runner-up.

Senior PM, Core Banking & API Products 2017 – 2019
Silicon Valley Bank · San Francisco, CA

- Shipped SVB's PSD2-compliant open banking API platform enabling third-party fintech integrations — delivered 6 months early, avoided $20M+ in regulatory penalties; pushed back on COO's aggressive roadmap with a structured mitigation strategy that was accepted in full.
- Drove 35% developer/partner API adoption growth; built regulatory traceability playbook mapping every PSD2 requirement to engineering tasks; defined API versioning and deprecation strategy for 40+ partner integrations — adopted as the SVB external API standard.

Senior Program Manager, Infrastructure 2015 – 2017
First Republic Bank · San Francisco, CA

- Led $10M telephony modernization across 93 branches in 11 states — 1,000+ Cisco devices, RingCentral rollout, <1% unresolved tickets.

AI PROJECTS & LIVE PRODUCTS

ImBranding · 2026 · AI brand voice & multi-platform content agent (Claude, Grok) · Private beta: saves users 5 hrs/week on social media management · kinhai-collab.github.io/imbranding

ByteSize · 2026 · AI YouTube summarization with audio narration (Claude, TypeScript) · Saves 10 hrs/week on research; mobile app and dashboard in development · video-summarizer.replit.app

EDUCATION & CERTIFICATIONS

MIT Professional Education — AI & ML Certificate · Top 10 Percentile · 2025
Computer Vision · NLP · Machine Learning · Edge AI

Certified AI Product Manager (CAIPM) — Dr. Nancy Li AIPM Accelerator · #1 / 20+ products · 2025

MBA — Big Data & Business Analytics · MSc — Big Data & Machine Learning · *US-evaluated (AACRAO / Validential Corp.)*

PMP · CSM · CSPO
